Secretariat Thiruvananthapuram Kerala

Subject: Executive Development Program—Call for Nominations

Dear Sir/Madam,

National Institute of Secretariat Training & Development (NISTD), Established by Govt. of National Capital Territory of Delhi, serves as the autonomous body and representative of the various segments of Indian Industry. The Institute provides the impetus and the Organizational Infrastructure to raise Quality level across the Industry. This helps to secure wider appreciation of the Interest of the Construction Business by the Govt.

Executive Development Programs conducted by NISTD are delivered on a continual learning philosophy and are ideal for working executives, who are hard-pressed for time and find it difficult to enroll for regular in long-duration Programs. These programs provide an opportunity for a class of people who have not had an opportunity to keep abreast of the latest managerial tools and techniques through formal management education.

**Note:** Participants opting for the residential program should check into the hotel on the day prior to the first day of the course (afternoon). Check-out will be the morning of day 3 of the course.

We are approaching you through this letter with a request to disseminate the list of these programs to all the departments/offices in your area of responsibility so that they can avail the benefit of the same. These programs will help the officers to identify the areas of weakness in the systems and thus boost the economy and employment in the State.

You are requested to kindly look at the attached Program Brochure for details. We solicit your kind cooperation by sending the nominations at earliest since it is a limited seat program and registrations will be done on first come first serve basis only.

Thanking you in anticipation, for any details please feel free to get in touch with undersigned.

We would also welcome invitation from your side for On-Site Training program at your premises.

Thanking you and assuring you of our best services
For National Institute of Secretariat Training & Development

(Addl. Director)

**IMPORTANT INFORMATION:**

The institute encourages prospective participants and their management to write in advance specifying any issues/problems areas which they would like to be included in course material and discussed during the workshop provided they are within the ambit of the subject of the program.

**OUR FACULTY**

We have our own regular Faculty. Serving officers are also invited by us as Guest Faculty. All our faculty members have rich experience since they are mostly retired Joint Secretary level officers.

**METHODOLOGY**

Our main emphasis is on having full involvement of the participants in the subject matter under discussion. Our faculty members deliver lectures interspersed with healthy discussion with participants so as to ensure that they get a full grip of the subject and have a clear concept of the rules and their application. Case studies, group discussion, exercises etc., are also held.

**INFORMATION**

Each nomination, Residential/Non-Residential, should be accompanied by a Demand Draft of the required amount drawn in favour of "National Institute of Secretariat Training & Development" payable at New Delhi and should be sent in advance along with the nomination. Payment for Defence Employers will be received after completion of the course and submission of our pre-received Bills.

- Chances of Outstation Utsne will not be accepted.
- Substitution of nominees is permitted.

Participants opting for residential accommodation are requested to go directly and check-in into the hotel. Participants are free to stay at any other place of their choice and convenience.

**TEA/COFFEE BREAK**

11:15 AM to 11:30 AM & 12:15 PM to 01:00 PM & 03:30 PM to 03:45 PM

**LUNCH**

01:00 PM to 02:00 PM

**ADMISSION PROCEDURE**

Admission will be made on first come first served basis only. Intimation regarding admission of the nominee to the program will be communicated as soon as possible after the receipt of the nomination.

**PROGRAMME DURATION & SCHEDULE**

The programme will be held in a three-day Technical Workshop. Timing will be 9:30 AM to 5:00 pm daily. There will be 4 sessions each day. Each session will be of 75 minutes duration.

**REPORTING TIME**

The participants are to report for registration at 9:00 AM at Venue.

**ARRANGEMENTS BY US**

Working Lunch, Tea/Coffee with Snacks, Course material, Pad, Pen, Bag, Folder, Participation Certificate, Photography, Transport: The candidates have to make their own arrangements.

**CERTIFICATION**

The participants will be awarded certificates on completion of the course without any abstention on 3rd day at the end of the course.

**CHANGE OF SCHEDULE**

The advertised program shall be conducted as per the schedule and will not be changed/postponed or cancelled except for reasons unforeseen beyond our control.

Note: You can call the Central Line +91-8811094923 for any queries regarding the Workshop.

Subject:- Study Tour of “South East Asian Models of Infrastructures Developed In Singapore, Kuala Lumpur & Bangkok”
Date 16-23 May, 2020

Dear Sir/Madam,

National Institute of Secretariat Training & Development (NISTD), Established by Govt. of National Capital Territory of Delhi, serves as the autonomous body and representative of the various segments of Indian Industry. The Institute provides the impetus and the Organizational Infrastructure to raise Quality level across the Industry. This helps to secure wider appreciation of the Interest of the Construction Business by the Govt.

The Complexities and Ever Changing Nature of today’s Business Environment necessitates constant Evolution and Upgradation of one’s Knowledge repository. While there is no match for Experimental Learning, one needs to keep abreast of Emerging Technologies and Good Practices to Improve one’s productivity on the project and overall work which are generally Technical in Nature. Its our Great Pleasure to convey you that we have conducted Training Programs for Construction Professionals, Specialized Program “South East Asian Models of Infrastructures Developed-Singapore, Kuala Lumpur & Bangkok”. This Program has been specially designed for the Executives & Decision Makers who are serving in Local, State, Central Govt. and the Corporate Sector. As you are aware that India is fast becoming a focal point for the world as a Business & Sports Destination and there is need for providing International Level facilities not only in Tier-I cities but also other cities which have great potential to Develop into International Business Centers.

The Development of Cities would provide better Job Opportunities for the Working Class, better Living Conditions for the family, Better Recreational and Amusement Facilities. In short a better life style for the citizen. With a view to Provide Ideas, Concepts And Exposure to the Decision Makers, NISTD is planning to organize a Study Tour of the proposed cities as on Date 16-23 May, 2020 (08 days) as their Infrastructure is considered as one among the best in the World. Course Fee is INR 3,68,000.00 (Three lakh Sixty Nine thousand rupees) per Participant + 18 % GST (Detail Enclosed).

Study tour participants: -- Bureaucrats, Engineers, Executives, Finance officers, Decision makers, Urban planners, architects and landscape architects, representatives of cultural organizations, and elected officials. These professionals will visit a range of projects and gain insight through meetings with city officials, site visits to ongoing projects, and meetings with community leaders. Tour focuses on cities in transition and the rehabilitation of run-down neighborhoods in Singapore, Kuala Lumpur & Bangkok.

The site visits are planned to give firsthand experience of the facilities providing services to the cities

A brief note about the Program is enclosed for your reference. May I request you to Convey your Willingness to participate in this program, and also the nomination of the other Officers from your Organization, who may like to participate to develop the Nation.

Thanking You,

For National Institute Of Secretariat Training & Development

Amit(G.)

(Executive Director)
The Indian government has undertaken concrete steps for making smart cities a reality with the recent announcement of 98 aspires. These smart cities will compete with each other to come up with holistic plans for becoming model cities. The government has incorporated sustainability as one of the key components of smart cities. With the increasing frequency of natural disasters, abnormal weather patterns and the looming threat of global warming, the concept of a smart city must be merged with sustainability for the welfare of people and our planet as a whole. The marriage of innovation with technology will go a long way in optimizing the management of infrastructure and resources and, at the same time, focusing on inclusiveness and a greener environment. Smart sustainable cities will lay the foundations for a better future—a future where cities care for people, the earth, air, water and the environment.

Cities are indispensable to nations—they are hubs of economic growth and innovation and are cultural melting pots. They usually have unique characteristics and a cultural identity, as well as present a multitude of options for business, employment, leisure, entertainment, healthcare and education. Given these attributes, cities attract people from rural regions seeking opportunities for employment, education and a better lifestyle. Hence, cities have been witnessing the megatrends of population explosion, a growing middle-class population and urbanization. By the year 2050, approximately 70% of the global population is projected to live in cities. India, too, is experiencing these trends, with an exponential growth in urban population owing to the promise of more employment and entrepreneurial opportunities and good quality of life.

Apart from advantages, urbanization also brings with it certain challenges. Many Indian cities are plagued with various environmental, social and economic issues such as resource scarcity, congestion, pollution, poverty, lack of affordable housing, proliferation of informal dwelling, as well as sewerage and sanitation problems. In fact, urbanisation is placing an environmental load on natural resources as cities account for 60-80% of energy consumption across the globe and for more than 70% of worldwide carbon dioxide emissions. In order to provide better living conditions for existing and future generations, cities need to be improved by adopting the smart route and at the same time focusing on the sustainability aspect.

Sustainability index (SCI) can be understood as resilient cities that can more readily adapt to, mitigate, and promote economic, social, and environmental change. Sustainable development encompasses all aspects of a city’s healthy development and should be done with a triple bottom line in mind—addressing economic, financial, social, and environmental issues.

Role Models: Singapore, Malaysia, Thailand

Singapore

The Urban Redevelopment Authority (URA) is Singapore’s national land use planning authority, which has been instrumental in building quality real estate. URA draws up long-term strategic plans, as well as detailed local area plans, for physical development, and then coordinates to turn its plans to reality. A professional way of managing and maintaining its real estate has given way to its continued economic progress and future development.

Space Utilisation

The space constraint seems to have come as a blessing in disguise for Singapore. The authorities focused on raising skyscrapers, high in number. Instead of scattering its facilities, successful attempts have been made to house everything at one place and in one building, have also added to Singapore’s beauty. Land use is intensified by locating various facilities together instead of separately. For example, storm water collection ponds are located under road flyovers; and stock factories, train stations and bus stations are located over each other. Also, there is a strive to constantly find ways to minimize constraints on development by using technology such as cleaner power station fuel to reduce buffer zones of polluting factories, or group such industries together and relocate them. Roads & other transport systems.

For countries like India where roads hardly bear the weight of vehicles, authorities in charge of road development here should visit Singapore to see how roads can host world-class events like Formula One Grand Prix! The country’s world-class connectivity makes the place a favorite tourist destination. It has an advanced metro system. The city-state’s bus network is one of the most efficient in the world. The MRT is the only underground railway system in the country.

Malaysia

Malaysia’s persistent drive to develop and upgrade its infrastructure has resulted in one of the most well-developed infrastructure among the newly industrialising countries of Asia. Peninsular Malaysia’s network of well-maintained highways is a boon to industries. These highways link major growth centers to seaports and airports throughout the peninsula and provide an efficient means of transport for goods, a Kuala Lumpur-Bangkok-Kuala Lumpur containerized service known as the Asian Rail Express (AREX).International trade, especially seaborne trade, has traditionally been the lifeblood of Malaysia, and developed well-known seaport cities like Port Klang and Port of Tantung Pelabu. Malaysia’s International Airports are ranked number one for overall business passenger satisfaction in an International Air Transport Association Survey. Industries in Malaysia are mainly located in over 200 industrial estates or parks and 14 Free Industrial Zones (FIZs) developed throughout the country. New sites, fully equipped with infrastructure facilities such as roads, electricity and water supplies, and telecommunications, are continuously being developed by state governments as well as private developers. The latest digital and fibre optics technology is being used to provide high quality telecommunication services at competitive prices.

Thailand

The Thai government has continuously improved the nation’s infrastructure, both in Bangkok and the provinces. Tremendous strides have been made, especially in transportation projects. Bangkok’s Skytrain was introduced years ago, making transportation more reliable in a city known for its traffic jams but after development of infrastructure including access to power and water, has helped Thailand fuel rapid economic growth during the past three decades and also helped facilitate international trade and improved the efficiency of everyday business activities. Thailand’s water transportation system has long been an important part of the country’s history and industries. With a coastline of 2,419 km and over 4,000 km of inland waterways, Thailand’s water transportation and ports infrastructure are essential to its overall transportation and trade.

The site visits are planned to give first hand experience of the facilities providing services to the cities. These would include:

Visit to Putrajaya planned city, the new capital of Malaysia. Visit to LRT systems, the LRT Authority, Kuala Lumpur. A visit to the Ministry of Urban Development – the Urban Redevelopment Authority, Ministry of Land Transport – The Land Transport Authority Gallery, Changi Water Reclamation Plant, Visit – BTS Sky train, Transportation Authority Bangkok.

Note: —There can be some changes in the Itinerary due to circumstances beyond our control.
